## Stud and Gracy - Your One-Stop Shop for Garments!

Welcome to **Stud and Gracy**, the go-to destination for all your garment needs. We are a dedicated team focused on providing our customers with top-quality clothing, specializing in t-shirts, underwear, and thermal wear.

With our **vast selection** of products, we ensure that you will find garments that not only meet your individual style preferences but also provide the **utmost comfort and durability**. Whether you are looking for **trendy t-shirts, reliable underwear** essentials, or cozy thermal wear for those colder days, we have got you covered.

Our t-shirts are crafted with the finest materials, **offering a range of designs, colors, and fits to suit everyone's taste**. Whether you prefer classic solid colors, eye-catching prints, or trendy graphics, we have something for everyone. Our t-shirts are not just fashionable but also made to last, ensuring you get the most out of every purchase.

When it comes to underwear, we understand the importance of **comfort and support**. Our collection includes a wide range of options, from boxers to briefs, ensuring that you can find the perfect fit based on your personal preference. Our underwear is designed using soft, breathable fabrics to provide maximum comfort throughout the day.

For those **chilly seasons**, our thermal wear collection is here to keep you warm and cozy. Made with high-quality thermal materials, our range of thermals offers excellent insulation to keep you comfortable in colder temperatures. Whether you need them for outdoor activities or simply layering under your daily attire, our thermals are an ideal choice.

**At Stud and Gracy**, customer satisfaction is our top priority. We strive to provide exceptional customer service, ensuring that you have a seamless shopping experience. Our team is always available to assist you with any queries or concerns you may have, ensuring that you are completely satisfied with your purchase.

So, what are you waiting for? Explore our **collection of t-shirts, underwear, and thermal wear, and experience the comfort and style that Stud and Gracy has to offer**. Shop with us today and discover the garments that will elevate your wardrobe to the next level!

# How to Check the Quality of the Polo T-shirt:

Ideally all garments look good when new, the problems may start surfacing once they are used. Therefore it is very important to understand the quality of the product you are purchasing. Getting the garment laboratory tested is a good option, but not always practical especially for small quantities. We suggest some simple ways which may help to check the quality of the product.

## 1. Put a sample shirt through a rigorous wash with detergent, flat dry it in the shade & look out for the following:

a. **Color Bleeding:** Tie a knot on any part of the t-shirt (preferably a sleeve) with a white cotton fabric and wash it with detergent. Once dried, open the knot and check if any stains of color have come on to the white cotton fabric. If there are no stains then it can be presumed that the t-shirt is color fast. Laboratory test reports normally give the degrees of fastness which are not much of a help.

b. **Color Fading in a T-shirt:** You need to check if the color of the t-shirt after washing looks dull and worn out. This usually occurs if poor quality of pigments have been used for dyeing the garment.

c. **Shrinkage:** Knitted Cotton by nature will always shrink in the initial 1-2 washes. Internationally the acceptable level of shrinkage is not beyond 5%. Measuring the t-shirt pre and post wash also helps you understand its shrinkage. If the shrinkage is more than 5% then inform your supplier and demand for a compacted pre shrunk t-shirt. Compacting is a process which helps you reduce the shrinkage, a good quality compacting will ensure the garment does not shrink beyond 3%. Certain styles of knitting such as Honey Comb, Waffle Knit Drop Needle, interlock or Pique if not compacted pre-shrunk may shrink as much as 15%.

d. **Possibility of Cotton Balls formation after a few washes:** If the fabric feels rough or its color lacks uniformity then there is a very high possibility the yarn used is carded or of a very low quality. On regular usage the t-shirt will develop cotton balls making it very uncomfortable to wear. Some manufacturers use softening agents to conceal the true quality of the fabric. Nevertheless, on closer look you will notice light and dark tones in the fabric color, this occurs as a carded yarn does not absorb the colors evenly. You should insist that the yarn used be "combed," unless your client has asked for a "Semi Combed" yarn to reduce upon the cost of manufacture.

2. **Quality of fusing used in the Placket (Button Area) of the Polo Shirts:** For polo shirts you need to ensure that a good quality fabric fusing has been used to create the placket. Manufacturers compromise by using fusing or low quality starched fabric fusing. In a couple of washes the paper fusing disintegrates or the starch washes away paper causing the entire front button and button hole part to go out of shape.

3. **Quality of stitching:** Ideally there should be a minimum of 10 stitches per running inch. You also need to check for flat lock stitching (double needle stitching) on the shoulders, armholes, sleeves and cuff joints and ribs stitched to the body of the garment for more durability. For polo shirts the cuffseams (from the inside) should be stitched and sealed to ensure the cuff ends do not open.

4. **Size of a T shirt:** Sizes of garments vary depending upon the country you are purchasing from. You should never go by the size mentioned on the label. Either try out the garment or specify the size in inches /cms and ask for it be labeled as per your requirement. The chest size of a T shirt is measure in width, an inch below the armhole horizontally. Many manufacturers choose to reduce upon the size of their garments to save on their cost of production. An inch reduced on the chest would result in 2 inches reduction in the diameter. The length of the polo shirt too needs to be checked, if tucked in the trouser the same should not fall short and keep slipping out. You also need to keep in mind that cotton by nature will always shrink in the first few washes.

5. **Thickness of the Collar & Cuff:** You need to ensure that the collar and cuffs knitting is not loose else the collar may curl upwards and the cuffs too may get loose.

6. **Quality of Button Holes:** The stitching creating the button holes should be very close to each other and tight, else the button holes will loosen.

7. **Lycra in the Rib of a Round neck:** T-shirt: 3% Lycra if added to the rib will prevent the neck from loosening and ensure it does not go out of shape

## Mens T-shirt/ Polo Shirt Size Chart:

SHIRT/T-SHIRT CROSS MEASUREMENT CHART						
SHIRT SIZE (SHOULDER)	36	38	40	42	44	46
T-SHIRT SIZES (CHEST)	38	40	42	44	46	48
LABELLED	XS	S	M	L	XL	XXL

ACTUAL T-SHIRT MEASUREMENTS						
LABEL	XS	S	M	L	XL	XXL

Length	30"	32"	34"	36"	38"	40"	42"	44"

Please note our sweat shirts have drop shoulder pattern. This is to ensure that the sleeves do not pull up on stretching your arms.

## Terms & Conditions

1. Any complain regarding the quality of the product should be intimated within 2 days of delivery.
2. Terms of Payment: 50% Advance and balance before dispatch of material
3. If any kind of branding is done by the purchaser on the garment the goods cannot be returned.
4. An order will be considered as confirmed from the date we receive an advance payment.
5. Tones of colors seen on the catalog may vary from the actual product.
6. Our rates are subject to change without prior notice. Please re-check the rates with us prior to confirmation of the order with your clients.
7. For export requirements please share the sizes with us ask for rates. The same varies as sizes of garments in each country varies.
8. Taxes will be charged extra. For purchases against form "C" excess payment will be refunded only after we receive the "C" form.
9. If the buyers preferred transporter is used then we are not responsible for any loss, delay, or damage of the consignment during transit.

### Option of Colors

In all possibility the colour of T-shirt you are looking for will be readily available. Nevertheless, if you do not find your specific tone or colour in our ready options, for large quantities we now undertake colour specific t-shirt orders. Share the Pantone number of the colour you need and we will dye it for you. In our quest to be your complete back end order fulfillment partner besides dyeing colours of your choice we also offer fabric treatments of specific nature such as Anti UV, Anti Microbes, Bio Wash, Fire retardant to our fabric.

### Branding Options

At Stud Aspires, in our continuous pursuit to help you service your customer beyond the blanks we also offer branding options of embroidery on Tajima machines, silk screen printing on butterfly machines, Direct to Garment printing on Kom L, Sublimation Printing on Epson and also Eco Encryption (final solution to all your branding limitations). In our endeavour to give the best branding results we are only using the best our industry has to offer. Our client servicing team will be happy to help and suggest the best option for your requirement. For those who are not familiar with Eco Encryption, attached is a logo for you to get a look and feel of the quality of branding:

### Partnering you in Growth

In our endeavour to ensure our business partners reach out to their clients with ease and effectively we have integrated systems which will help your business grow.

**1: Your own t-shirt website:** Creating your own client friendly t-shirt website has never been made so easy, all you need to do is get yourself a domain name and our online software will assist you through the rest. You have complete control over your website, change banners, select garments from our wide array of options and showcase it with a price tag you wish to offer, the back end software will work out the calculate the number of stitches of embroidery or the colour of the print uploaded by your client and work out the price on your behalf for your client.

All you need to do is feed per colour print, per 1000 stitches of embroidery or size wise sublimation printing cost. You could also have slab based pricing depending on the quantity you would like to showcase from the wide array of options we have to offer

**2: Our entire inventory at your finger tips:** You no longer need to call us to check on our stock availability, no more hassles of trying to reach us or waiting for a reply. The entire Stud t-shirt inventory is now accessible to you online. Just register with us and you could block or buy our stocks with ease. Online and offline payment option are now available.

**3: Label your t-shirts with your company name:** In ensuring that you reach out far and reach out effectively to your client Stud now offers the facility of printing your label on the garments at no additional cost barring a one time development charge. As your back end order fulfillment partners we are making all efforts to help your brand have a top of mind recall amongst your client. Create your label's artwork in a single colour and share it with us.
